SOFTWARE DEVELOPER

I am a motivated software engineer with over 2+ years of experience, currently working at Jio Platforms Limited. I specialize in web and mobile application development, with skills in Angular, Python (FastAPI), and React. I have built and deployed cross-platform apps, led the development of crucial modules like SLA tracking and service anomaly detection, and worked on innovative projects like face mask detection. My passion for problem-solving and continuous learning drives me to deliver efficient, scalable solutions.

PROFESSIONAL EXPERIENCE

Jio Platforms Limited, Mumbai

July 2022 - PRESENT

Software Engineer / Team Lead

As a Software Developer at Jio Platforms Limited, I lead a team of 4 members, where I oversee the development of front-end applications using Angular and ensure efficient back-end services with FastAPI. My responsibilities include designing and implementing scalable solutions, coordinating tasks within the team, and integrating robust APIs to meet project requirements. This role has allowed me to enhance my leadership skills while staying hands-on with full-stack development.

The Sparks Foundation

April 2021 - May2021

Intern

Completed an online internship at The Sparks Foundation, where I gained hands-on experience in integrating APIs using JavaScript. I successfully implemented the Razorpay payment gateway for seamless online transactions, and designed the front-end with HTML and CSS to ensure a smooth user experience. This project enhanced my skills in API integration, client-server interactions, and front-end development, while giving me practical exposure to real-world payment solutions.

EDUCATION

Bachelor of Engineering in Computer Science

Pillai College Of Engineering —New Panvel

CGPA : 8.01/10.00

Gained a strong foundation in computer science with hands-on experience in Algorithm, Data Structures, Web Development, through various projects and coursework.

PROJECT

- **Portfolio — Mobile App / Website**
- **Face Mask Detection— Application**
- **Spotify Bot— Application**

ACHIEVEMENT

- Led the development of an SLA module to improve tracking and compliance with customer agreements.
- Implemented a service anomaly detection module, enhancing system reliability and proactive issue resolution.
- Developed a generic processor module to streamline data processing workflows and boost operational efficiency.
